Hanson Solar, LLC

Chapter 313 Application Panther Creek CISD

TAB 7

Description of Qualified Investment

Hanson Solar, LLC plans to construct a 396 MW solar farm with attached battery storage in Coleman County.

This application covers all qualified property in the reinvestment zone and the project boundary within Panther Creek CISD necessary for the commercial operations of the proposed solar farm described in Tab 4. Three Hundred and Ninety-Six megawatts (396 MW) of generation and attached battery storage will be located in Panther Creek CISD. Panel placement is subject to change but for purposes of this application, the Project anticipates using approximately 1,240,504 PV modules or equivalent and 104 inverters.

This application covers all qualified investment and qualified property necessary for the commercial operations of the solar farm and battery storage. The batteries included in the Qualified Property will solely be used for the storage of electricity generated by the qualified property in this Application within Panther Creek CISD.

Qualified Investment and qualified property includes; solar modules/panels, tracking equipment, racking and mounting structures, O&M building, substation, inverters boxes, combiner boxes, meteorological equipment, foundations, roadways, paving, fencing, collection system, generation transmission lines, interconnection facilities, energy storage enclosures containing batteries, energy storage cooling systems, SCADA systems, transformers, fire suppression systems and all necessary ancillary equipment for commercial generation of electricity.

*NOTE: The map in TAB 11 shows the potential locations of improvements within Panther Creek CISD boundaries; however, the final number of panels and inverters and the location of each of these facilities is dependent upon ongoing negotiations with power purchasers and other factors.
